Nadia Karimi, Ph.D.

Assistant Professor, Department of Computer Science, Example University of Technology
Office 4.12, Science Building, 100 University Ave, Examplecity | nadia.karimi@example.edu | +1 (555) 013-2288

RESEARCH INTERESTS

Machine learning for health data, causal inference, fairness in predictive models, privacy-preserving analytics.

EDUCATION

Ph.D., Computer Science 2014 - 2019
Example Institute of Science. Dissertation: *Robust Estimation of Treatment Effects from Observational Clinical Records.* Advisor: Prof. A. Example.

M.Sc., Statistics 2012 - 2014
University of Sampleton

B.Sc., Mathematics (First Class) 2008 - 2012
Example National University

APPOINTMENTS

- **Assistant Professor**, Example University of Technology (2021 - present)
- **Postdoctoral Research Fellow**, Center for Health Data Science, Example Medical School (2019 - 2021)
- **Research Intern**, Sample Labs AI Group (Summer 2017)

PEER-REVIEWED PUBLICATIONS

(equal contribution; students underlined in the original CV)*

1. Karimi, N., Osei, K., & Lindgren, P. (2024). Doubly robust estimation with missing covariates in electronic health records. *Journal of Applied Computational Methods*, 18(2), 211-238.
2. Nguyen, T., **Karimi, N.** (2024). Auditing subgroup performance gaps in clinical risk scores. *Proceedings of the Example Conference on Machine Learning for Healthcare*, 340-352.
3. **Karimi, N.**, & Brandt, S. (2023). Federated causal discovery under limited communication. *Transactions on Data Privacy (Example)*, 7(4), 55-79.
4. Osei, K., **Karimi, N.**, Fernandez, L., et al. (2022). A benchmark for fairness-aware survival models. *Example Conference on Neural Information Processing Systems, Datasets Track*.
5. **Karimi, N.** (2021). Sensitivity analysis for unmeasured confounding in cohort studies. *Statistics in Medicine Research Letters (Example)*, 12(1), 9-21.
6. Lindgren, P., **Karimi, N.**, & Wu, J. (2020). Learning interpretable risk scores with monotonic constraints. *Journal of Biomedical Data Analytics*, 5(3), 144-160.
7. **Karimi, N.** (2019). Robust propensity estimation with heavy-tailed outcomes. *Annals of Example Statistics*, 47(5), 2501-2530.
8. Brandt, S., **Karimi, N.** (2018). Efficient bootstrap methods for matched cohorts. *Computational Statistics Letters (Example)*, 9, 77-90.

GRANTS AND FUNDING

- **PI**, "Fair and Reliable Risk Scores for Primary Care," Example Health Research Council, $412,000 (2023 - 2026).
- **Co-PI**, "Privacy-Preserving Analytics Platform for Regional Hospitals," Example Innovation Fund, $890,000 (2022 - 2025).
- **PI**, Early Career Seed Grant, Example University of Technology, $25,000 (2021 - 2022).

TEACHING

- CS 4410 - Machine Learning (Fall 2021, 2022, 2023, 2024); average evaluation 4.5 / 5.
- CS 6620 - Causal Inference for Data Scientists (Spring 2022, 2023, 2024) - new graduate course I developed.
- Supervision: 3 Ph.D. students (primary advisor), 2 M.Sc. students (completed), 6 undergraduate research projects.

HONORS AND AWARDS

- Best Paper Award, Example Conference on ML for Healthcare (2024)
- Faculty Early Career Teaching Award, Example University of Technology (2023)
- Outstanding Dissertation Award, Example Institute of Science (2019)

PROFESSIONAL SERVICE

- Program committee: Example ML4H (2022 - 2025), Example NeurIPS Datasets Track (2023 - 2024)
- Reviewer: Journal of Applied Computational Methods, Statistics in Medicine Research Letters
- Department: Graduate admissions committee (2022 - present); Seminar series co-organizer (2023 - present)

INVITED TALKS

- "Fairness Gaps You Cannot See," Sample Medical Center Grand Rounds, March 2024.
- "Causal Inference in the Wild," Example Summer School on Data Science, July 2023.
- "Privacy and Causality," Workshop on Trustworthy ML, Example Research Institute, Nov 2022.
